

## 1. Installation & connection

# 2. Installer Configuration

**Ouick Installation Guide USB** interface Ū LED indicator

eSolar GPRS/4G

LED indicator status description			
Green	flicker	GPRS in normal work	
	long onlight	GPRS is not connected to the server	
Blue	flicker	Bluetooth is connected	
Green/blue	off	In communication with equipment or no power supply	

#### (1) Download eSolar O&M APP and register an account

For iOS system, you could search "eSolar O&M" in App Store to download and install this APP. For Android system, you could search "eSolar O&M" in Google play to download and install this APP. For iOS/Android system, you can directly log in on https://fop.saj-electric.com by scanning QR code to install "eSolar O&M" APP.

After download, please use the installer account to login.

#### (2) GPRS/4G connection

After installation of the module, power on the inverter. Wait for 2 minutes, if the module signal light is green, it means that the module is working normally and sending data to server. If the station is builded, the inverter information can be viewed in APP or website.

### (3) Bluetooth connection

(1) Turn on mobile phone's Bluetooth connection.
